Q ⚡💡⚙️

```
#### Warp has a modern input editor that works like an IDE
#TODO: Fill in your name, email, and occupation below!
--- command that subscribes user email john-doe@gmail.com
--- command that asks/submits occupation student
--- john doe
```

Warp comes fully integrated with AI. Press the '#' symbol to invoke AI
command suggestions. Try describing how to start a new React project now!

Q ⚡💡⚙️

One unique feature about Warp is that it groups terminal input and output into one atomic unit called 'blocks'.

OK

```
